SUMMARY

Second-year B.Tech student building web applications with AI features. Hands-on with the Google Gemini API, JavaScript and Python, and currently learning Rust. Seeking open-source programs and AI-application internships.

EDUCATION

Bharati Vidyapeeth's College of Engineering, New Delhi - Expected 2029
Bachelor of Technology (B.Tech.), second year. Class 10: 87% | Class 12: 82%

PROJECTS

EveryRupee - AI-assisted personal finance web app (team project) | Jan 2026 - Present
GitHub | Live demo

- Addresses low financial literacy and scam awareness among everyday users in India with free, jargon-free tools.
- Built the Financial Education hub in HTML, CSS and JavaScript: eight topics (cards, UPI, net banking, loans, EMI, KYC) plus a glossary.
- Team project spanning planner, tax and investment pages, deployed on Vercel; includes a finance-only assistant on the Google Gemini API, restricted to finance questions.
- MIT-licensed public repository with contributor guidelines and labelled issues for outside contributors.

Mitti AI - AI marketing assistant for clay and terracotta artisans (team project) | Mar 2026 - Present
GitHub | Live demo

- Conceived the idea: help artisans without marketing skills present handmade products online.
- Built the AI generation section using the Google Gemini API: a product photo upload produces a description, Instagram caption, SEO keywords and design ideas.
- Team delivered the web interface (landing page, dashboard, idea generator) and deployed it on Vercel.

LEADERSHIP EXPERIENCE

Outreach Head, Techshuttle (College technical society) | Sep 2025 - Present

- Lead outreach for society events: approached sponsors and invited stalls to college events.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS
AI and LLM: Google Gemini API, prompt engineering
Tools: Git, GitHub, Vercel
Learning: Rust, systems programming

OPEN SOURCE AND INTERESTS

Open-source programs (Google Summer of Code, Linux Foundation) as a goal; Rust and systems programming; developer tools; practical AI applications.
